

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

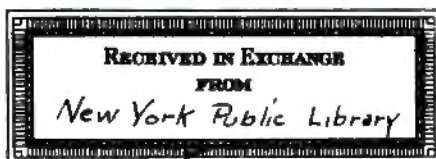

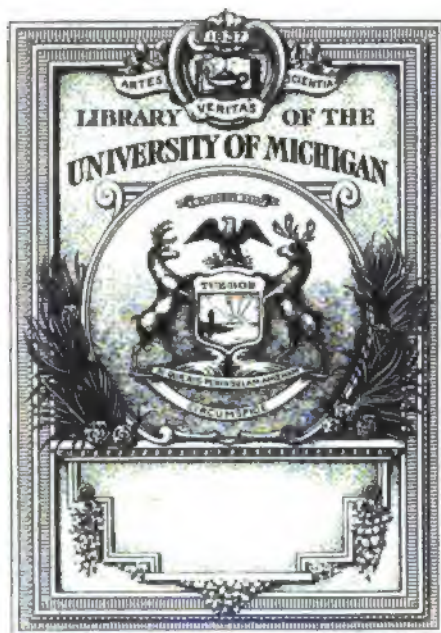

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. OFFICIAL DOCUMENT,

No. 8.

COMMUNICATION.

To His Excellency. MARTIN G. BRUMBAUGH,
Governor of the Commonwealth of Pennsylvania.

Sir:

I have the honor to present herewith a report of the Department of Labor and Industry of Pennsylvania, covering production statistics for the year ending December 31, 1915.

Respectfully submitted,

JOHN PRICE JACKSON,
Commissioner of Labor and Industry.

FOREWORD.

(By the Commissioner of Labor and Industry.)

The following material is a Production Report compiled by the Pennsylvania Department of Labor and Industry. The material for this report covers the entire year of 1915, and was collected from the industrial plants of Pennsylvania during the year 1916. It was then tabulated and put into publication form in the Bureau of Statistics and Information under authority of Act of Assembly approved June 2, 1913. This report gives a very full statement of the capital invested; value of products; number of wage earners employed, their nationality and sex; wages paid in total; workers under sixteen years of age; wages received by number of workers receiving amounts ranging from under \$3.00 to over \$25.00 per week in detail; number of wage earners by months, etc. Tabulations including all of this material are given for the various sub-divisions of industry in Pennsylvania. This report includes establishments of two or more employes, but does not include mercantile establishments. It does include, however, the great bulk of industries in Pennsylvania, and it gives a basis of reference of material value to manufacturers, law-makers, and to all those studying industrial problems. An evidence of this fact is that, during the present war time particularly, in very many cases, the officials of the national government, as well as state authorities, have called upon the Department for information which is contained in this report. These inquiries included a wide variety of most important governmental purposes and are exclusive of the large number of similar requests from employers, official organizations and others.

At the time of writing this foreword, which is just before the manuscript goes to print, and at the end of the 1917 session of the Legislature, it is worth while possibly to refer to some phases of the work of the Department of Labor and Industry.

The Bureau of Employment, created in the legislative session of 1913, looms up at the present moment as an organization of preëminent usefulness. Due to the departure of many foreigners to join their respective armies in Europe, and the taking away from our industries of the members of the National Guard, the volunteers to

the Regular Army and the men drafted into the National Army, there is in progress a rapid shift of labor, and consequent change of labor conditions. This shift already indicates that there will be substitution of large numbers of women for men in our work places. In order that this shift may be accomplished effectively and without the mistake of putting women in places where they will receive physical injury, a very careful organization is demanded. In addition to the use of women, it is being found possible to put to work many men who are partially crippled or disabled or who have reached a ripe old age. Indeed, in many cases, the employment of such people is not only giving happiness to them, but is showing them to be capable of much more effective service than would have been thought possible in normal times.

At the time of the opening of the war with Germany, the Department of Labor and Industry, under laws passed in 1915, had already organized and firmly established the beginning of a state system of free employment. The ideals of this system are:—first, to prevent unnecessary idleness by establishing clearing houses throughout the State for quickly placing employes, whose previous work is ended, into places calling for workers; and second, and possibly more important, to use this system in such a way that the qualified man for a given job will be placed in that job. The belief, well verified by experience, is that such a system not only saves many times its cost in actual idleness avoided, but is of further almost inestimable value in the savings made by the better assorting of men to their jobs. It has been found that the man who is well qualified for a position and who is doing work that he likes will usually continue in that work because of the consciousness of satisfaction to his employer and to himself; while the man who takes a job for which he is not properly qualified will probably soon leave. The result of this latter condition has been that many of our establishments have had to expend several times the amount of money for constantly employing new men than would have been required for the number of men at work at any one time. Thus, one establishment, in order to keep 1000 men at work during a recent year, took on 5000 men. Each of these 5000 men, as he came in new, cost the company a material sum while he was becoming familiar with his surroundings and his new work. Indeed, that sum amounted to an exceedingly heavy drain upon the resources of the concern. It may be impossible ever to eliminate entirely such shifting of labor from place to place, but it is undoubtedly possible to reduce to a much smaller per cent. the terrific loss caused thereby in Pennsylvania.

Recognizing the importance of this work as one of its great duties, the State Safety Committee, appointed by the Governor for the purpose of directing extraordinary war activities, decided to join with

the Department in extending and enlarging this work. This junction has been so far worked out that the Director of the State Bureau of Employment is also Superintendent of the State Safety Committee's employment work. The State Safety Committee and the Bureau of Employment have already opened many additional free employment offices throughout the Commonwealth and proposes, before the year is over, to have such offices in practically every large industrial center in the State. Already it has been found that this enlarging system is proving to be a potent implement for making the great shift of war time labor possible.

A subject closely allied to the employment problem is that of accidents.

Due to the war time shift and the enormous increase in the amount of production throughout the Commonwealth, with the consequent increase in the number of workers,—a great proportion of whom are entirely green to their working conditions,—industrial accidents have naturally been on the increase. This condition of affairs is one to be looked upon with the utmost concern. It not only strains the emotions of the reasonably human man to know that one quarter of a million industrial accidents are occurring annually, under the present disturbing conditions,—with many deaths and total disability mutilations,—but this condition appears distinctly at the present moment as a useless waste of man power which should be conserved to the utmost in order that we may keep our army supplied with men and may produce the supplies necessary for maintaining our army. The Department has been distinctly active in fighting this terrible scourge through the finest set of safety standards developed in any State in the Union; by continuous series of safety rallies; by thorough inspections of all plants and the demanding of safeguards; by the establishment of safety committees or safety organizations in practically all of our plants.

Reports received from large numbers of individual establishments indicate that this great campaign has been productive of far reaching results and that without it our industrial accidents would have been still more appalling. Nevertheless, by reason of the conditions explained above,—mainly of green men going into industry, and into industries with which they have not heretofore been familiar,—the loss is tremendous. There must even be renewed and greater activities for safety in industry.

The Department has just requested every corporation in the State to start a series of periodical safety classes to be conducted during the fall and winter, and has instructed all inspectors to spend the noon period daily in making addresses to groups of employes on the basic principles of carefulness and safety.

Closely allied with the subject of safety comes the necessity for education. Undoubtedly, the most effective method of combating our terrific loss due to accidents in this Commonwealth and this Nation will be by the introduction of safety study in our public schools. No boy should finish his early school education without having been in classes which take up the subjects of carefulness and safety in work with the same thoroughness as is now given to classes in hygiene and spelling. The tendency toward such an educational development is very great and should be a generally accomplished fact within a short period. Indeed, there is not a day to lose.

Another most important educational phase of the safety subject is that of shop schools. In the present war crisis, the employing of green men in industries where the new workers are absolutely unprepared for their duties and unable to protect themselves or to give good production, will be looked upon by future generations as a practice almost criminal as well as wasteful. Undoubtedly, the best solution of this condition of affairs, and one which should be maintained in future years even after the war is over, is to establish shop schools.

New employes should be put into such practical schools and should be kept there until they can go into the regular work not only with safety to themselves, but with the capability to produce a fair return. Comparatively little instruction would be necessary in a great number of industrial processes. The information that the workers would get, however, from that amount of necessary instruction, might only be gotten by them in the shop itself, and probably could not be obtained by years of experience outside, during which period there might be disastrous results not only to themselves, but also to their fellow workers.

France, after the Franco-Prussian War, leaped into almost immediate prominence as an industrial nation, and to a large extent on account of just such industrial schools. For these reasons, this Department earnestly urges that employers throughout the State investigate this problem of shop schools, for all men newly employed, as a business project which will return many fold its cost.

Our system of continuation and vocational schools is doing much to advance the efficiency and capability of our workers, but these schools do not take the place of the training schools in the shops. At this time, labor disturbances, due to differences between employers and employes, should be rigorously avoided. On the one side, the employes naturally want as good conditions and as high wages as can reasonably be obtained. On the other side, the officials of corporations want to bring to their stockholders reports showing as great profits and earnings as is reasonably possible. The accomplishment of the aims of these two groups naturally result now and then in con-

troverſy. Our Bureau of Mediation and Arbitration has found that each of the aims is approximately equally reſponſible in labor diſturbances. The great bulk of the employers and the employes, through patriotic motive, at the preſent time, are undoubtedly endeavoring ſincerely to keep production going. On the other hand, the enormous ſhifting of prices on all commodities has made an unſtable condition, which, with the beſt endeavors, has reſulted in much diſturbance in readjuſtment. This was difficult to avoid. However, the Bureau of Mediation and Arbitration of the Department of Labor and Industry in this Commonwealth has been very actively and continuously at work in all ſections of the State, and has, I am happy to report, been able to prevent or to ſhorten the duration of a very large number of labor diſturbances ſince the war began. Indeed, up to the preſent time, to a very large extent through the friendly intervention of our mediators, and due to the patriotism of our people, ſuch diſturbances have been limited to thoſe of comparatively ſmall importance in Pennsylvania. It is hoped that employers and employes will not only continue as heretofore to avail themſelves of this branch of State activity, but will increase that uſe to the maximum. We do not believe that even with the preſent and growing effectiveness of our mediators that mediation alone will ſolve the great problem of equable diſtribution of the profits of labor and capital, but we do believe,—and this belief is baſed upon actual experience which has ſaved this Commonwealth many millions of dollars and is now helping to preſerve maximum production,—that this form of friendly mediation is ſo developing civil and peaceable negotiations between employers and employes that it will gradually lead to a knowledge of the beſt methods for the ſettlement of labor diſputes.

Another phase of the problem of the conſerving of man power and its moſt effective utilization for obtaining the higheſt output, both for the benefit of the man himſelf and the Nation, is that of promptly caring for accidents after they have occurred. A man ſeriously injured may, with proper attention, ſoon recover his health, but with poor and delayed attention, he may either die or be a confirmed cripple or invalid. For the purpoſe of developing the moſt effective attention to this work, this Department has held, during the paſt year or two, quarterly meetings, under the direction of the Division of Hygiene and Engineering, of a great body of phyſicians of the State who care for thoſe injured in our mines and mills. Theſe meetings have attracted Nation-wide attention and, combined with the large amount of material in the way of printed inſtructions and ſuggeſtions given out by this Division, much good has been done. In this work, the employers have co-operated vigorously in eſta bliſhing local ſhop hospitals, firſt aid kits, and the installation of trained doctors and nurses.

There are many other phases of the departmental work dealt with in the report of this Department, published under separate cover. That report describes the great work being done in bringing our munitions and explosives plants to a state of reasonable safety; the eradication of fire traps in our theatres and picture show establishments with the substitution of well built, well arranged, and safe buildings for such purposes; the development of the Bureau of Municipalities, which is rapidly becoming of inestimable value to the cities and boroughs of the State as a source from which they can secure information which will aid them in the proper development, planning, and carrying on of the intricate business of such local subdivisions of the Commonwealth; the putting forth in the form of bulletins and posters, all information whereby employers and employes can, with economic advantage, improve the conditions of the worker and the prosperity of the concern.

In closing, I desire to say that, in my judgment, the Department has gathered together a body of unusually competent employes of high ideals. Few, if any, of the people associated with the Department, are, apparently, working for their pay checks alone. Indeed, the enthusiasm of the organization to accomplish useful work, is its predominant note. There have been very few changes in the personnel of the Department except those caused by additions due to the laying upon the Department of new duties by the Legislature. Such changes as there have been, have almost invariably been where employes have left to take more important positions in larger places of influence and at salaries which the Department could not equal. Indeed, the Department is, apparently to a certain extent, becoming a training school to which industrial leaders are looking for men. This, in a way, is a handicap to us, because for this reason, we now and then lose men whose services are of the utmost importance to the work of the State.

JOHN PRICE JACKSON.

Commissioner.

The Department of Labor and Industry has frequently been requested to supply statistics concerning industrial establishments by county classification.

In order to supply the demand, tables carrying such information have been compiled, giving available data. It was found impracticable to give the number of establishments for each product, without disclosing the business of individual industrial operations, which is contrary to law. The amount of capital invested, likewise, could not be given for the reason that many concerns operate plants in more than one county, and considerable time and expense would be involved in order to supply this information for each county.

The following county classification does not fully cover all the industries for the reason that a number of establishments have failed to comply with the law requiring reports to be made to the Department of Labor and Industry. The Department, however, has reduced this delinquent list so far as time would permit, and further steps are being taken to this end. The tables giving statistics by county follow in alphabetical order. The data given, however, is believed to be so nearly complete as to furnish a fairly reliable index of the amount and kind of industry carried on in each county—agriculture excepted.

CHAPTER II.

Classification and Recapitulation of all Industries reporting for the year 1915.

Classification and Recapitulation of all Industries by counties, reporting for the year 1915.

NOTE.

Industrial establishments are coded in the following county classification tables under their principal product,—numbers of employes, and amount of wages paid, being tabulated accordingly; hence, where numbers of employes and amount of wages paid are not indicated in the table, it will be understood that the subject item designates a minor product and not the principal product of an establishment.

Butter, cheese and condensed milk,	391	305	60	1	109	7	844,700
Canned and preserved goods,	396	1,170	772	6	905	3	9,095,900
Chocolate and cocoa products,	305	130	127	8	46	1	894,700
Coffee and spices, roasting, etc.,	338	98	104	30	16	8	695,500
Confectionery,	328	1,389	253	20	608	34	941,400
Cordons and syrups,	345						3,589,400
Flour and grist mill products,	325	35					8,589,400
Ice cream,	324	402	104	35			74,700
Glucose and starch,	305	498	310	47			1,595,300
Ice,	307	87	8	1			3,400
Glazes,	307	87	8	1			1,346,300
Slaughtering and meat packing,	325	1,813	634	30	1,190	5	464,100
Winegar and cider,	325	18	5	2	11		83,889,400
Beefing and horse,	325	32	7	3	16		130,000
Broods and hogs,	325	32	7	3	16		19,400
Gloves, leather,	370	81	71	8	44	1	160,000
Gloves, rubber,	370	14	3	1	6		384,000
Hides and skins,	370	11	6	1	9		30,000
Leather, tanned, curried and finished,	378	119	47	73	11		2,523,900
Leather goods, not specified,	308	30	15	6	19		72,300
Books and papers,	308	45	48	5	11		631,500
Trunks and suit cases,	308	56	17	1	5		54,500
Carbonated beverages,	301	56	75	19	5		195,000
Liquor, distilled,	140	156	117	8	58	1	301,900
Liquor, malt,	311	1,268	1,148	73	384	3	58,700
Table water,	305	35	40	1	2		987,000
Barrels, kegs and tanks,	374	280	175	40	230	12	27,800
Billiard tables and supplies,	308	33	11	4	87		62,800
Bones, clean,	308	111	148	15	75	0	97,800
Bones, packing,	308	207	123	3	207	4	37,000
Carriages, wagons and parts,	308	330	164	45	240	20	556,100
Cooperage, etc.,	301	14	6	8	18	1	99,800
Furniture,	301	150	33	1	175	2	219,900
Timber and timber products,	300	73	60	8	73		436,300
Mod and patterns, not paper,	307	70	70				87,400
Playing mill products,	300	767	680	13	55,000	1	511,400
Refrigerators and ice boxes,	317	231	100	50	231	1	55,000
Wood, turned and carved,	308	27	17	10	37	1	163,200
Bags, paper,	308	9					674,500
Bags, fancy and paper,	305	367	7	1	180	4	168,400
Electroplating engraving and dye sinking,	307	305	11	1	215	6	170,400
Labels and tags,	304	35	10	9	68	3	47,800
Paper goods, not specified,	300	287	115	105	274	13	70,000
Photo engraving,	314	74	3	3	78	1	139,900
Printing and publishing,	300	2,041	68	41	2,548	110	180,400
Roofing paper,	308	67	86	6	409	3	3,189,500
Stationery goods, not specified,	308	1					3,800
Stereotyping and electrotyping,	308	33	35	6	38	4	25,800
Carpets and rugs,	308	3	8	3	3	2	8,000
Cotton goods,	315	179	39	140	83	1	1,000
Cordage and finishing textiles,	305	2					265,900
